### Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Molecules* deals with the structure-activity relationship of all natural compounds (animal and microbial toxins, antioxidants, anti-cancer, *etc.*) of interest in a wide range of areas (neurobiology, pharmacology, immunology, toxinology, toxicology, *etc.*), from basic research to the clinical applications. The molecules of different nature (peptides, proteins and organic compounds), size and functions—as well as molecular complexes—will be considered for publication. Submissions of manuscripts in the various fields of research and from all countries are strongly encouraged.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
