Terpenes, Steroids and Their Derivatives

Guest Editors:

Prof. Dr. Pavel B. Drasar

Department of Chemistry of
Natural Compounds, University
of Chemistry and Technology,
Technická 5, CZ 166 28 Prague,
Czech Republic

Prof. Dr. Vladimir A. Khripach

The Institute of Bioorganic
Chemistry, The National
Academy of Sciences of Belarus,
5/2 Academician V.F.Kuprevich
Street, BY-220141 Minsk, Belarus

Deadline for manuscript
submissions:

closed (28 February 2023)

Message from the Guest Editors

Terpenes and steroids, including their derivatives and general isoprenoids, as natural secondary metabolites, are playing stable and growing roles in human and veterinary medicine, supramolecular chemistry, food and cosmetic R&D, industry and an increasing number of other fields. Their importance is based, i.a., on the fact that they are mostly bound to renewable sources, which, in fact, makes them valuable within a circular economy. Terpenes and steroids are also an origin of stereochemistry, regioselectivity, chirality and many other features and disciplines within science, development and industry on a scale which is indispensable.

This Special Issue aims to further underline current developments in all fields that are connected to terpene and steroid research and utilisation and will present a sequel to the successful Special Issues of *Molecules* edited by Vladimir Khripach and Pavel Drašar.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical
Biology and Phytochemistry,
University of Münster,
Corrensstrasse 48, D-48149
Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
