

## Special Issue

# Chromatography and Spectrometry in Food Safety and Pharmaceutical Analysis

### Message from the Guest Editors

Quality control methods are essential in the pharmaceutical and food industries to ensure patient and consumer safety. The use of chromatographic techniques in combination with other methods such as spectrometry allows for accurate separation/identification/quantification of many bioactive compounds as potential components of drugs and food. Therefore, the purpose of this Special Issue is to present new, high-quality research and knowledge concerning the application of chromatographic and spectrometric methods for accurate separation, identification and quantification of various natural and synthetic bioactive compounds as potential drugs and food components. This includes but is not limited to:

- chromatographic methods (TLC, HPLC, GC) in the analysis of natural and synthetic bioactive components of pharmaceuticals and food;
- chromatographic techniques in the analysis of new drug substances;
- spectrometry in the pharmaceutical and food analysis;
- method development for quality control of food and pharmaceuticals;
- food safety control;
- QSPR and QSAR investigations.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
