Heteroaromatic Compounds: Design, Synthesis and Biological Activity

Message from the Guest Editor

Heteroaromatic compounds play a pivotal role in drug discovery, serving as essential structural components in a vast array of marketed therapeutic compounds, drug candidates, and natural products. These cyclic compounds, characterized by the presence of atoms other than carbon in their ring structure, offer a wide range of chemical functionalities vital for modulating biological activity, leading to improved potency, selectivity, safety, and pharmacokinetic profile. The objective of this Special Issue is to highlight approaches related to the rational design, synthesis, and therapeutic potential of novel heteroaromatic compounds for the development of more reliable, target-based, and pharmacologically active compounds.

Guest Editor

Dr. Ioannis Kostakis

Department of Pharmacy, Division of Pharmaceutical Chemistry,
National and Kapodistrian University of Athens, 15771 Athens, Greece

Deadline for manuscript submissions

closed (31 October 2024)

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of
Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
