

Special Issue

Functional Nanomaterials for Biosensors and Biomedicine Application

Message from the Guest Editors

Functional nanomaterials refer to nanomaterials with diverse compositions, structures, and morphologies. Taking advantage of their unique properties of small-size effects, surface effects, and quantum-size effects, functional nanomaterials have found amazing applications in the fields of biosensing, bioimaging, and biomedicine. This Special Issue focuses on recent achievements in functional nanomaterials for biosensors and biomedicine applications. We invite original contributions, as well as review articles, related to the rational design, synthesis, and application of novel functional nanomaterials with unique properties (such as carbon dots, metal-organic frameworks, novel two-dimensional nanomaterials, etc.) in biosensors and biomedicine.

Guest Editors

Prof. Dr. Liqiang Luo

Department of Chemistry, College of Sciences, Shanghai University, Shanghai 200444, China

Prof. Dr. Xiaoqiang Liu

College of Chemical and Molecular Sciences, Henan University, Kaifeng 475004, China

Deadline for manuscript submissions

closed (30 June 2025)

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
