Advances in the Biosynthesis and Chemical Synthesis of Natural Products

Message from the Guest Editors

Natural products are an important source of innovative drug discovery for their complex chemical structures and broad biological activities. The biosynthesis and chemical synthesis of natural products play a critical role in the development of new innovative drugs.

Meanwhile, the synthesis of natural products is the most active field in organic synthesis and natural product chemistry. Recently, with the quick development of synthetic biology, the biosynthesis of natural products has achieved impressive achievement, which has also inspired organic chemists to develop novel synthetic methodologies and strategies toward the synthesis of bioactive natural products. Following on from these advances, this Special Issue, titled 'Advances in the Biosynthesis and Chemical Synthesis of Natural Products', invites the submission of research papers and reviews on the biosynthesis and chemical synthesis of natural products.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
