

Special Issue

Chromatographic Methods for Monitoring Food Safety and Quality

Message from the Guest Editors

This Special Issue on “Chromatographic Methods for Monitoring Food Safety and Quality” is a unique opportunity to gather papers describing the state of the art of chromatographic methods to control the safety and quality of foods. This topic involves scientific communities working in food authentication, food chemistry, and the analysis of contaminant residues in foods, and involves laboratories working on the revalorization and characterization of bioactive compounds from any food. Therefore, we welcome the submission of papers dealing with both chromatographic method development and with the application of chromatographic methods on food quality and safety, including raw materials.

Guest Editors

Prof. Dr. José Bernal del Nozal

I.U. CINQUIMA, Analytical Chemistry Group, Faculty of Sciences, University of Valladolid, 47011 Valladolid, Spain

Dr. Ana M. Ares

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
