Present and Future of Food Chemistry Research: A Young Researchers' Perspective

Message from the Guest Editors

Food chemistry is the study of chemical processes and interactions of all biological and non-biological components of foods. It has involved the identification and isolation of constituents, analytical characterization, chemical structure, biological activity, bioaccessibility and bioavailability of molecules/constituents, fermentation changes, biosynthesis, etc. in food. Food chemistry is also about modern packaging and food storage methods. New food information will enable the design of new functional and dietary foods. With the main aim of sharing the latest research results of food chemistry, and giving voice to young researchers, we have set up this Special Issue of *Molecules*. Where we want to collect original research articles, communications and reviews on any topic related to food chemistry, in which young researchers play a prominent role (first author and/or corresponding author, shared or not with a senior author).

Guest Editors

Dr. Anna Jakubczyk

Dr. Katarzyna Lisiecka

Dr. Kamila Rybczyńska-Tkaczyk

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
