

Special Issue

Biomimetic Nanotechnologies for Disease Diagnosis and Treatment

Message from the Guest Editor

Biomimetic nanomaterials are functional materials with special and excellent properties designed and synthesized by utilizing the natural principle of biomimicry. And biomimetic nanomaterials possess some unique physicochemical properties which have attracted great interest and attention. In the past few years, we have witnessed the rapid development of biomimetic nanomaterials in the fields of biosensing, disease diagnosis and therapy. This Special Issue will discuss the latest research progress of biomimetic nanotechnologies in the biomedical field. We welcome submissions (original research and reviews) from researchers. Potential topics include, but are not limited to, the diagnostic treatment of diseases, biosensing, catalysis, and research articles in the field of bioimaging.
Dr. Shulin Liu

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
