

Special Issue

New Horizons for Deep Eutectic Solvents

Message from the Guest Editor

We are pleased to invite you to submit original articles or reviews to a Special Issue in *Molecules* entitled “New Horizons for Deep Eutectic Solvents”. Although DESs have been extensively studied, especially in the last decade, it is very difficult to predict a general trend for the development of this research area for the lack of a deep understanding of the principles underlying their formation and governing their properties. The topics addressed in this Special Issue represent novel avenues of enquiry into the understanding of DES properties and the development of innovative applications in previously unexploited fields.

- deep eutectic solvent
- natural deep eutectic solvents
- green solvent
- solvent design
- eutectic point
- physicochemical properties
- supramolecular network
- separation processes

We kindly invite you to contribute an excellent paper to the SI. You are welcome to visit the [website](#) and submit your paper [here](#). If you have any questions, please feel free to contact Cecilia Li (cecilia.li@mdpi.com), the managing editor from Molecules editorial office.

Guest Editor

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
