

## Special Issue

# Catalysis for Green Chemistry II

### Message from the Guest Editor

Synthetic chemistry has greatly enriched people's lives and dramatically changed the world in every aspect due to its impressive capacity to construct diverse functional groups and structurally complex molecules. However, traditional synthetic reactions normally suffer from low atom economy, harsh conditions, as well as hazardous waste production. Recently, the general principles of green chemistry have required the design of environmentally benign organic reactions, which is of great importance for the sustainable development of our society. Therein, it is pivotal to achieve new catalytic strategies for organic synthesis guided by the connotations of green chemistry. The goal of this Special Issue is to collect original research papers and review articles devoted to all aspects of homogeneous and heterogeneous catalysis for green chemistry, including metal catalysis, organocatalysis, photocatalysis, and biocatalysis. Submission of manuscripts describing green catalytic technologies such as flow chemistry, multiphase catalysis, green reagents and solvents, catalyst immobilization, and recycling is also encouraged.

### Guest Editor

Prof. Dr. Lu Liu

Division of Organic Chemistry, School of Chemistry and Molecular Engineering, East China Normal University, Shanghai, China

### Deadline for manuscript submissions

closed (1 August 2025)

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of  
Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
