Exclusive Contributions by the Editorial Board Members (EBMs) of the Applied Chemistry Section of *Molecules*

Message from the Guest Editor

This Special Issue of *Molecules* is dedicated to recent advances in applied chemistry and mainly comprises a selection of exclusive papers by the Editorial Board Members (EBMs) of the Applied Chemistry Section. While contributions from other authors will also be considered, this issue focuses primarily on highlighting recent interesting investigations conducted in the laboratories of our section's EBMs, providing an attractive open-access publishing platform for applied chemistry research data.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
