

## Special Issue

# Bioactive Compounds from Natural Sources

### Message from the Guest Editors

Natural products and their extracts play a key role in almost every field of chemistry and biology, from microbiology and biochemistry to medicine and bioinformatics. Food bioactive compounds are extra-nutritional constituents that typically occur in small quantities in foods. In summary, numerous bioactive compounds appear to have beneficial health effects. Much scientific research needs to be conducted before we can begin to make science-based dietary recommendations. This Special Issue welcomes both original articles and reviews focusing on the properties of bioactive compounds from natural sources.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
