

## Special Issue

# Cardiovascular Diseases Prevention and Therapy

### Message from the Guest Editor

Cardiovascular disease remains a major medical burden throughout most of the world. Despite the underlying complexities involved, development of novel strategies for treating cardiovascular diseases, encompassing abnormalities of the heart and blood vessels, relies strongly on the identification of cellular and molecular mechanisms for treating these disorders. This represents a major challenge for researchers. This Special Issue of *Molecules* will address the complex fundamental problems underlying cardiovascular disease as they relate to both prevention and treatment. We welcome manuscripts encompassing multifaceted aspects of cardiovascular disease including physiology, pharmacology, and biochemistry with particular emphasis on cellular and molecular phenomena. Both comprehensive experimental studies and review articles will be considered for this Special Issue.

### Guest Editor

Prof. Dr. Morris Karmazyn

Retired, Department of Physiology and Pharmacology, University of Western Ontario, London, ON N6G 2X6, Canada

### Deadline for manuscript submissions

closed (31 March 2019)

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
