Recent Advances in Cannabis and Hemp Research

Message from the Guest Editor

Cannabis sativa is an annual herbaceous plant that has been used for centuries for food, fiber, and traditional medicine. Within the cannabis plant, three primary cultivar groups are chosen for cultivation to produce industrial fibers, hemp seeds, and phytocannabinoids employed for both recreational and medicinal purposes. Anticipated growth in the cultivation of hemp and cannabis is expected in the upcoming years due to the changing legal landscape and broader acceptance of cannabis-related products across the globe. This Special Issue endeavors to present recent discoveries in the chemistry and biology of secondary metabolites within both hemp and cannabis, including cannabinoids, terpenes, and phenolics. This Special Issue will also cover research on valorizing by-products generated by the cannabis industry, contributing to the sustainability of the emerging agro-industry. This Special Issue will publish both research articles and review papers related to cannabis and hemp.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
