Cholinesterase Inhibitors

Message from the Guest Editor

Acetylcholinesterase (AChE, EC 3.1.1.7) plays a pivotal role in cholinergic transmission in the central nervous system and at the neuromuscular junctions (NMJ). Even if its physiological role has not yet been identified, butyrylcholinesterase (BChE, EC 3.1.1.8), also named pseudocholinesterase, is well known to play a role in metabolizing bioactive esters (e.g., succinylcholine, cocaine). The effects of cholinesterase inhibitors (ChEIs) have been investigated in diseases associated with a cholinergic deficit, such as Alzheimer's disease (AD) and other dementias. Although ChEIs afford mostly a symptomatic response to AD patients, the development of new ChEIs (e.g., multifunctional ligands, selective BChE inhibitors) remains of interest to treat neurodegenerative diseases.

In this Special Issue, we invite you to submit original research papers or reviews, which report on the design, synthesis, and biological evaluation of novel ChEIs.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
