

Special Issue

Drug Discovery and Delivery Systems

Message from the Guest Editors

For this issue of *Molecules*, we are interested in high-quality publications (e.g., research, reviews) covering all aspects of nano-based delivery systems for the treatment of different diseases. There are numerous drug delivery systems focused on the designing of novel delivery systems with the main focus on their application to disease conditions. Conventional delivery systems have many challenges such as side effects, high dosing and toxicity. The entrapment of drugs in the nanodelivery systems offers numerous advantages of increased solubility, targeted delivery, imaging, lesser toxicity and enhanced therapeutic efficacy. This Special Issue also covers the research/reviews addressing the delivery systems that present other relevant contributions to the field of nanomedicines.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
