Environmental Analytical Chemistry

Message from the Guest Editors

The domain of environmental analytical chemistry includes all analytical aspects of studies related to the environmental problems and their management. The analysis of organic, inorganic and radioactive pollutants in air, water, soil and biota is quite a challenging task at the time of large social development and climate changes. In addition, the development of new analytical methods or improvement of existing ones for the monitoring of pollutants is of a paramount importance for achieving such goals. The other important task is implementation of appropriate methods and procedures for pollution risk assessment revealing sources, pathways of exposure, trends and spatial distribution of analyzed pollutants. For these reasons, we would like to invite you to contribute to this Special Issue of *Molecules* titled "Environmental Analytical Chemistry". Your valuable unpublished research can find a worldwide audience among readers of *Molecules*.

Prof. Dr. Stefan Leonidov Tsakovski

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
