

Special Issue

Functional Foods and Nutraceuticals 2021

Message from the Guest Editor

The Editorial Board of *Molecules* invites you to contribute to a Special Issue entitled “Functional Foods and Nutraceuticals 2021”. Although there is still no consensus on an exact definition of the term, any food claimed to have a health-promoting and/or disease-preventing property beyond the basic nutritional function of supplying nutrients is called a “functional food” or “medicinal food”. Sometimes, functional foods are called nutraceuticals, a portmanteau of nutrition and pharmaceutical, which could include food that has been genetically modified. The general category of Functional Foods and Nutraceuticals includes processed foods made from functional food ingredients such as bioactive proteins (peptides), polysaccharides, lipids, phytochemicals (polyphenols and carotenoids), or foods fortified with health-promoting additives (e.g., “vitamin-enriched” products), as well as fresh foods (e.g., vegetables) that have specific health claims attached. we are pleased to invite you to publish in this Special Issue in the form of full articles, communications, or reviews.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
