Special Issue

Glass-Ceramic Functional Materials: Synthesis and Applications

Message from the Guest Editors

We are pleased to invite you to contribute to this Special Issue of Molecules. This Special Issue is devoted to various synthesis, processing, and characterization methods of different types of nanostructured glassceramic systems, including materials with linear and non-linear optical properties, functional materials for energy, coherent and non-coherent optical sources, photocatalytic materials with a special interest in water splitting, glass-ceramics with interesting electrical and magnetic properties, modelling of photonic glassceramics, bioactive glass-ceramics, and others. In this Special Issue, we will provide the state-of-the-art technological advances and the latest and novel research in the synthesis, processing, and characterization used to analyse the chemical and physical properties of these systems, focussing on the innovative applications of nanostructured glassceramics. The study of different physical phenomena, and the relationship between structural, mechanical, and the optical, dielectric, and magnetic properties of glass-ceramics are also welcome.

Guest Editors

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
