Special Issue

Ionic Liquids: Green Solvents for the Future

Message from the Guest Editors

By the end of the 21 century, ionic liquids (ILs) had started to attract significant interest from the scientific community due to their potential applications and as alternatives to organic solvents. These substances are normally composed of organic cations and anions, so that just by swapping the ions that compose the substance it is possible to change the physical properties of the IL. This classification has been challenged because of the toxicity of some of the cations and anions used in their preparation, among other reasons. However, their employment in the development of new environmentally friendly applications (e.g., CO2 capture or the development of more efficient batteries) is reinforcing the role of ILs as green solvents.

The current Special Issue aims to provide a view of the most recent advances in the development and employment of ionic liquids. The topics of interest include but are not limited to the synthesis of these substances, their physical and chemical characterization, and their application.

Guest Editors

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
