

Special Issue

New Insights into Kinase Inhibitors II

Message from the Guest Editor

This issue is a continuation of the previous successful Special Issue “New Insights into Kinase Inhibitors”.

In the last 30 years, kinases have been widely studied as drug targets to inhibit proliferation and angiogenesis in cancer therapy. Kinase inhibitors now represent one of the major classes of chemotherapeutics, with 52 kinase inhibitors having been approved as anticancer agents.

This Special Issue will highlight new insights into the discovery of new kinase inhibitors, from the investigation of new targets to the identification of novel small molecules. Contributions to this issue, both in the form of original articles or reviews, may focus on powerful strategies and technological advances in the synthesis of more efficient and selective compounds, new strategies to overcome kinase inhibitors resistance, and improvements regarding the use of kinase inhibitors in oncology and other pathologies, in which therapeutic combinations with less toxic and off-target effects are considered.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
