

## Special Issue

# Matrix Infrared Spectra and Molecular Structures of Reactive Intermediates

### Message from the Guest Editor

The reactive intermediates generated in chemical reactions, such as free radicals, unstable ions, and activated complexes, are short-lived and highly reactive. Identification of such chemical species is important to help understand chemical reaction mechanism. The reactive intermediates can be isolated in low temperature matrix, which can be identified by infrared spectroscopy. Such MI-IR (matrix isolation–infrared spectroscopy) technique goes back for many years, which is continuously used to identify the reactive species. The state-of-the-art theoretical calculations are performed to confirm the assignments of matrix infrared spectra and explore reaction mechanism and nature of bonding. This Special Issue will focus on recent progress of matrix isolated reactive intermediates, both experimentally and theoretically.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
