Selected Papers from the 7th European Chemical Biology Symposium 2021 (ECBS/LS EuCHEMS)

Message from the Guest Editors

The 7th ECBS/LS EuCHEMS (ECBS 2021) will be held at the University of Milano-Bicocca in Milano, Italy, from 24 to 26 May 2021. Among the topics addressed at this conference are: artificial intelligence in drug design, small molecules targeting nucleic acids, new pharmacological approaches: targeting protein degradation, protein aggregation and self-assembly, bio-nanotechnology and synthetic biology, natural compounds chemistry and biology, glycochemistry and glycobiology, fighting resistant pathogens, and new approaches in antiviral therapies. Attendants of the conference, especially early-stage researchers, are cordially invited to contribute to this Special issue with original research papers or reviews. You are welcome to visit the [website](#), and submit your **abstract** and **full paper**. We look forward to receiving your contribution.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
