

Special Issue

Forensic Practices and Innovations: Instrumental Analyses, Data Correlations, Legislative Comments, and Case Studies

Message from the Guest Editors

Today, we are witnessing an incredible increase in interest in the field of Forensic Sciences, the possible applications of new instrumental configurations techniques and sample treatment, statistical/chemometric approaches, legal implications, analysis on unconventional samples, and a possible correlation between analyte concentrations detected in different matrices. This Special Issue aims to collect the state-of-the-art on the main topics in the Forensic field: hyphenated techniques and instrument configurations, innovative sample treatment procedures, forensic analysis, legislative comments, nonconventional matrix analysis, new psychoactive substances, chemometric approaches, and social situations. The aim is to produce a collection/commentary that can make even non-experts understand the application potential of the innovations obtained in this area and, if necessary, apply and extend them to other fields. In order not to limit the types of publications and to provide a more detailed panorama of the topic, original papers, reviews, short communications, notes, commentaries, case studies and application notes will be accepted.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
