

## Special Issue

# Progress of the Key Materials for Solar Cells

### Message from the Guest Editor

Photovoltaic is one of the most promising technologies to tackle today's energy and environmental issues, and can directly convert solar energy into electricity. The development of solar cells has witnessed the advancement of their key component materials, e.g., absorbers, window materials and electrodes, which substantially determine the cost, efficiency and stability of the resulted devices. Participants of the symposium, as well as all researchers working in the field, are cordially invited to contribute original research papers or reviews to this Special Issue of *Molecules* which report on the design, synthesis, modification and application of key materials for next-generation photovoltaic technology towards green and cheap solar electricity.

### Guest Editor

Prof. Dr. Shuang Yang

Engineering Research Center of Hierarchical Nanomaterials, School of Materials Science and Engineering, East China University of Science and Technology, 130 Meilong Road, Shanghai 200237, China

### Deadline for manuscript submissions

closed (30 November 2021)

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
