

## Special Issue

# Bioactive Phenolic and Polyphenolic Compounds-2nd Edition

### Message from the Guest Editor

Phenols and polyphenols are a class of plant secondary metabolites recently drawing particular interest due to their broad spectrum of pharmacological effects. The second edition of the Special Issue also aims to collect papers dealing with the determination of bioactive phenolic and polyphenolic compounds in food and natural products; in addition, a particular focus on new achievements in the field will be appreciated. You are welcome to visit the [website](#), submit the [abstract](#) and [full paper](#) to the Special Issue. Any questions please feel free to contact Larry Li ([larry.li@mdpi.com](mailto:larry.li@mdpi.com)).

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
