New Biologically Active Substances from Plants and Animals of the Pacific Region

Message from the Guest Editors

The Pacific Region is unique in its nature and living organisms. It is the birthplace of *Panax ginseng* and *Stichopus japonicus*, as well as other plants. In this Special Issue, we invite investigators to contribute original research articles, as well as review articles that are related to new biological activity substances from plants and animals of the Pacific Region.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
