

Special Issue

Natural Products with Biological and Therapeutic Activity

Message from the Guest Editors

Extracts from plants have been used for thousands of years as medicines. Nature offers an astonishing structural variety of compounds, and secondary metabolites such as terpenoids, polyphenols, and alkaloids have a plethora of biological properties, including antioxidant, antimicrobial, anti-inflammatory, antidiabetic, anti-obesity, and antitumor activity.

The issue is dedicated to bioactive natural products extracted from edible and non-edible plants and fruits, and from the waste of agri-food industry processes, with emphasis on novel biological targets and pharmacological studies (both in vitro and in vivo). Works employing innovative and green extraction/isolation methodologies, bioassay guided approaches, and metabolomics methods are much appreciated.

Biological and pharmacological studies involving biopolymers and natural products/natural extracts-based biopolymers are also welcome. Reviews investigating the state of the art related to extracts from “medicinal plants” or to a single class of natural products and their biological and therapeutic activities will be considered.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
