

## Special Issue

# Advances in Targeting Canonical and Non-canonical Nucleic Acids Structures

### Message from the Guest Editors

In this Special Issue, we invite the submission of short communications, original research articles, and reviews focusing on the biophysical determination and regulation of canonical and noncanonical nucleic acid/protein complexes, including, among others, histones or histon-like proteins, transcription factors, and repair and duplication enzymes. The interaction of small molecules/metal complexes with canonical/noncanonical nucleic acid structures, as well as the effect of DNA lesions on the molecular structure, will also constitute a particular focus of this issue. Moreover, research contributions combining molecular modeling along with experimental structural, photophysical, and molecular biology techniques (e.g., Cryo-EM, X-ray, UV-Vis spectroscopy, circular dichroism, FRET, fluorescence analyses, etc.) able to synergically shed light into the drug/target binding mechanism are particularly welcomed.

### Guest Editors

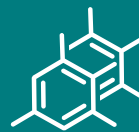

Dr. Angelo Spinello

Prof. Dr. Giampaolo Barone

Dr. Antonio Monari

### Deadline for manuscript submissions

closed (30 June 2022)

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
