Special Issue

New Trends in Graphene Nanomaterials

Message from the Guest Editor

Graphene-based nanomaterials represent a rapidly evolving class of substances with exceptional physicochemical properties and a wide range of potential applications. This Special Issue of Molecules, "New Trends in Graphene Nanomaterials", aims to present recent advances in the design, synthesis. functionalization, and characterization of graphene and its derivatives. We welcome original research articles and comprehensive reviews that address novel synthetic methodologies, structural modifications, and hybrid systems involving graphene. Particular attention will be given to studies that elucidate structure-property relationships and explore applications in catalysis, energy conversion and storage, biomedicine, sensing technologies, and environmental protection. This Special Issue aims to provide a platform for interdisciplinary dialogue and to highlight emerging directions in graphene research that bridge fundamental science with technological innovation. Contributions from both experimental and theoretical perspectives are encouraged.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
