

Special Issue

Lithium Battery Materials: Developments and Perspectives

Message from the Guest Editor

Lithium has the lowest reduction potential and small ionic radii, which gives it a high cell potential and power density. These advantages have led to a wave of research in this area in recent years. However, the potential power stability and cost issues of lithium batteries have led to the development of new materials and chemical technologies for lithium batteries becoming a research hotspot. We are pleased to invite you to contribute to this Special Issue, "Lithium Battery Materials: Developments and Perspectives". The following types of manuscripts will be considered for publication: full research articles, short communications and reviews. This Special Issue will include, but is not limited to the preparation, characterization, development and performance of novel lithium battery materials. We also welcome research on battery chemistry and electrochemical mechanisms.

Guest Editor

Dr. Zhen Wu

School of Energy and Power Engineering, Jiangsu University, Zhenjiang 212013, China

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
