

## Special Issue

# Air Purification: Control of Volatile Organic Compounds and Carbon Dioxide

### Message from the Guest Editor

Volatile organic compounds (VOCs) and carbon dioxide (CO<sub>2</sub>) emitted from both anthropogenic and natural sources pose significant health risks and environmental impact, while CO<sub>2</sub> plays an important role in driving global warming. The effective control and purification of VOCs and CO<sub>2</sub> are essential for creating healthier indoor environments, mitigating outdoor air pollution, and addressing climate change. This Special Issue focuses on the latest advances, technologies, and strategies in air purification to manage VOCs and CO<sub>2</sub>. Topics include, but are not limited to, innovative adsorption materials, catalytic oxidation methods, photocatalysis, biofiltration, and advanced membrane technologies. We invite contributions from researchers, practitioners, and policymakers to share original research and review articles. This platform aims to foster collaboration and innovation to address the challenges of VOC and CO<sub>2</sub> management in diverse environments.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
