

Special Issue

Organometallic Catalysis in Organic Synthesis

Message from the Guest Editors

Catalysis by organometallics is currently of utmost significance in important industries. Therefore, this Special Issue aims to illustrate the most recent and pertinent developments on the multiple, innovative uses of organometallics as effective homogeneous and heterogeneous catalysts in a plethora of organic syntheses. Organized, so as to cover new applications of organometallics where metals pertain to the main groups, transition metals or rare earth metals, the contributions will focus on a broad range of organic reactions, such as C-H activation, C-C bond formation, addition, condensation, metathesis, isomerization, oligomerization, hydrogenation and hydrogen transfer, oxidation, epoxidation, hydration, hydroboration, hydrosilylation, hydroxylation, hydroformylation, carbonylation, cyclopropanation, cyclization and related reactions, as well as on their involvement in the synthesis of polycyclic compounds or bioactive natural products.

Guest Editors

Prof. Dr. Albert Demonceau

Prof. Dr. Ileana Dragutan

Prof. Dr. Valerian Dragutan

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
