

Special Issue

Phytochemistry, Biological Activities and Applications of the Piperaceae

Message from the Guest Editors

Dear colleague, The Piperaceae is a large family with as many as 50 genera and nearly 4000 species. Members of the Piperaceae, especially Peperomia and Piper species, are rich sources of biologically active phytochemicals with a high structural diversity. In this special issue, we invite reviews and research articles that identify the chemical components, demonstrate the biological activities, and illustrate recent advances and discoveries in the Piperaceae.

Prof. Joyce Kelly R. da Silva
Assistant

Guest Editors

Prof. Dr. William N. Setzer

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2026).
