

Special Issue

Themed Issue Dedicated to Prof. Bernard Boutevin

Message from the Guest Editors

Prof. Dr. Bernard Boutevin, born in 1948, received his PhD degree in 1974 from the University of Montpellier, France, and joined the French National Centre for Scientific Research (CNRS). He was appointed a full professor in 1999. Pr. Boutevin is a member of the American Chemical Society and Groupe Français d'Etudes et d'Applications des Polymères (GFP).

The topics of his research first concerned the telomerization of a wide variety of monomers including fluoroalkenes but also styrenics and acrylics: kinetics, chemical modifications, and their use in block and grafted copolymers. His research was then directed toward telechelic oligomers, and all the methods of controlled radical polymerization (or RDRP). In the last decade, he has been quite interested in the synthesis and use of new biobased building blocks and polymers.

Molecules is pleased to announce this Special Issue to celebrate Prof. Bernard Boutevin's 73rd birthday and his enormous contributions in the field of polymer chemistry. This special issue is dedicated to all aspects of Polymer Chemistry, in particular, following Prof. Bernard Boutevin's interests.

Guest Editors

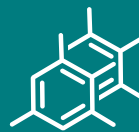

Dr. Benoît Briou

Dr. Bruno Ameduri

Prof. Dr. Cyrille Boyer

Deadline for manuscript submissions

closed (30 April 2024)

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
