Emerging Drug Targets: New Challenges for the Medicinal Chemist

Message from the Guest Editor

More than 25 years after the “Lipinski’s rule of five” and in the era of drug repurposing, this Special Issue aims to present innovations in modern medicinal chemistry that enable us to understand the importance of developing small molecules for use as drug candidates against emerging targets. In the world of big data, of databases containing millions of fragments, and of artificial intelligence, the discovery and validation of novel pharmacological targets remains a focus of research. This Special Issue aims to collect original contributions that describe the study of new or repurposed compounds targeting innovative pathways or macromolecular interactors. Mechanistic studies, target validation, rational drug design and the repurposing of drugs fall within the scope of this Special Issue. Research and review articles are welcome.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
