Special Issue

Recyclable and Re-useable Catalysts

Message from the Guest Editors

Environmental issues have changed the nature of chemical research. Green chemistry involves reducing waste, while sustainable chemistry uses clean technologies. Recycling is important considering the limited availability of noble metals. A Special Issue on catalyst recycling and a survey of various aspects of these matters is therefore timely. The choice of metal oxides allows for specific applications and recyclability without loss in activity, and such catalysts play an important role in the synthesis of multicomponent reactions (MCRs), and biological and photo-catalysts. This Special Issue aims to bring together recent advances in the design of varied nanomaterials and their application as recyclable catalysts. Results obtained from homogeneous and heterogeneous (immobilized) metal complexes, solid heterogeneous catalysts and nano-composites employed as recyclable catalysts are of interest. Original research papers and reviews encompassing recent efforts on various aspects of recyclable catalysis are all welcome.
Prof. Dr. Árpád Molnár

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt
Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2024).
