

## Special Issue

# Recent Insights on the Molecular Basis Food Quality and Security Analysis

### Message from the Guest Editor

The concept of food quality has changed remarkably during the last 3–5 years, a trend that is expected to continue because it is a dynamic concept affected by objective and subjective factors. Food quality requires the accumulative efforts of all the stockholders involved in a food chain to avoid problems arising during production, transportation, distribution, and marketing. Food quality is also affected by food adulteration, food authenticity, and food fraud. Food acceptability and satisfaction for consumers depend on the food's physicochemical properties, such as its appearance (color, size, shape, gloss, and consistency), flavor, and texture. Food safety relates to managing, processing, and storing foods to reduce individuals' risk of becoming ill from foodborne diseases. Food analysis is vital because with suitable, reliable, accurate, and precise methods, we can detect food quality or food safety hazards in the food chain. In this context, we hope that researchers and scientists from food quality, food safety, and food analytical techniques are encouraged to contribute to this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
