Special Issue

Perspective in Synthetic Medicinal Chemistry

Message from the Guest Editor

We wish to put together a Special Issue of *Molecules* entitled *Perspectives in Synthetic Medicinal Chemistry.*We would like to collect research that focuses on medicinal chemistry in any and all disease areas. Topics of special interest include novel pharmacophore design, synthesis, and biological evaluation methods, as well as novel methodologies towards biologically active molecules. We look forward to receiving your submissions.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
