

## Special Issue

# Research and Application of Food By-Products, 2nd Edition

### Message from the Guest Editor

There has recently been an upward trend in interest in recycling food byproducts. Such waste management is consistent with sustainable development goals, has an impact on the environment, and has a positive economic impact. Many studies have demonstrated that waste products are a good source of nutrients and can be utilized in food or other items. Following the popularity of the last Special Issue edition, we have produced a second Special Issue version. The aim of this Special Issue of *Molecules* entitled "Research and Application of Food By-Products, 2nd Edition" is to present research on the application of analytical chemistry, biochemistry, molecular analysis, physical analysis, and microstructure observation in the study of food by-products. Methods for processing food by-products and optimizing production can also be given. As a result, in this Special Issue, we welcome authors to provide the most recent scientific news, insights, and breakthroughs in the field of food by-product analysis and processing.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
