

## Special Issue

# Anti-cancer Agents from Natural Products

### Message from the Guest Editors

We are hoping to provide informative studies to our audiences, for example, efficient extraction or separation methods for natural products exploring, significant leading compound investigation, in-depth molecular mechanism study on anti-cancer effects, application of novel materials or structures in drug delivery systems, natural products combined with first-line drugs, or some clinical trials on certain potential candidates derived from natural products.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
