

Special Issue

Design, Synthesis and Biological Evaluation of Novel Small Molecules Inhibitors

Message from the Guest Editor

This Special Issue is to focus our attention on the most recent studies in the design and synthesis of small-molecule inhibitors, as well as on the discovery of naturally occurring small molecules that are able to inhibit biological targets and are useful as potential therapeutics. This Special Issue will accept original research papers and high-quality reviews that cover multiple aspects of small molecule inhibitors focusing on:

- The design, synthesis, and identification of new small molecule inhibitors;
- The biological evaluation of small molecules endowed with biological activity as inhibitors;
- The isolation and identification of small-molecule inhibitors from natural sources;
- The evaluation of molecular mechanisms and biological targets of new small molecule inhibitors.

This Special Issue will serve as an important contribution to the knowledge of the importance of small-molecule inhibitors in drug discovery and pharmacology.

Guest Editor

Dr. Letizia Giampietro

Department of Pharmacy, University "G. D'Annunzio", Chieti-Pescara, Italy

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
