

## Special Issue

# Molecular Magnetic Response and Aromaticity

### Message from the Guest Editor

This Special Issue welcomes contributions that address both methodological advancements and critical assessments of magnetic criteria for aromaticity, with applications to diverse systems such as boron clusters, organometallic compounds, and non-planar  $\pi$ -conjugated molecules. We aim to obtain a deeper understanding of the opportunities and limitations of magnetic response in contemporary studies of aromaticity.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
