Analytical Chemistry in Japan

Message from the Guest Editor

In Japan, many researchers are working on the topic of analytical chemistry, with outstanding results. In order to collect those new results from the researchers in Japan, a Special Issue entitled “Analytical Chemistry in Japan” is being launched. This Special Issue collects full papers and high-quality review papers in all fields of analytical chemistry. We kindly encourage the colleagues involved in all branches of analytical chemistry to make contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
