Development and Application of Anti-protozoan Agents

Message from the Guest Editor

There are growing needs for the new anti-protozoan agents to treat the neglected tropical diseases (NTDs). So far, numbers of lead compounds have been discovered from natural sources, and some of them were successfully developed as anti-protozoan drugs. However, the emergence of resistance against existing drugs or unavailability of treatments for some of the NTDs still force us to search for new anti-protozoan drugs. With this situation in mind, in this Special Issue on “Development and Application of Anti-protozoan Agents”, we would like to get together for the development of new treatments against NTDs.

Guest Editor

Prof. Dr. Yoichi Nakao

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
