

Special Issue

Anti-inflammatory Activity of Natural Products and Alternative Medicine

Message from the Guest Editors

Recently, human health has been threatened by the increase of environmental pollutants. The air quality in cities is worsening due to the increase in particulate matter (PM), carbon gas generation, yellow dust, exhaust gas, and cigarette smoke, and the incidence of inflammatory diseases is increasing. In addition, as air pollution and the global COVID-19 pandemic are increasing mask use, various skin diseases such as contact dermatitis and eczema are also increasing. Therefore, we intend to investigate the pharmacological effects of natural products and alternative medicine, focusing on inflammatory diseases caused by environmental factors. We cordially invite you to publish research or review papers in this Special Issue, which aims to summarize the findings of recent studies on the bioactivity of natural and alternative medicines. In particular, it is focused on inflammatory diseases caused by environmental factors, such as atopic dermatitis, rhinitis, allergic conjunctivitis, asthma, chronic obstructive pulmonary disease (COPD), and inflammatory bowel disease. We hope that many interested authors will participate.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of
Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
