Anti-inflammatory Activity of Natural Products and Alternative Medicine: 2nd Edition

Message from the Guest Editors

In recent years, there has been a growing interest in harnessing the therapeutic potential of natural products and alternative medicine to combat inflammation—a pervasive factor in various health conditions. This Special Issue serves as a dedicated platform to explore and dissect the multifaceted aspects of the "Anti-Inflammatory Activity of Natural Products and Alternative Medicine: 2nd Edition" This Special Issue brings together a diverse array of research articles, reviews, and studies that delve into the following key themes: Natural compounds: unveiling the anti-inflammatory properties of natural compounds, ranging from botanical extracts and dietary constituents to minerals and herbal remedies. Pharmacological mechanisms: investigating the underlying molecular pathways and biological mechanisms through which natural products exert their anti-inflammatory effects. We cordially invite you to publish research or review papers in this Special Issue, which aims to summarize the findings of recent studies on the bioactivity of natural and alternative medicines.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
