# Bioactive Peptides—From Therapy to Nutrition

### Message from the Guest Editors

Peptides are found in all forms of life and, regardless of their origin being natural or synthetic, are undeniably established as most invaluable assets for virtually all fields of science and technology. Bioactive peptides, for their intrinsic ability to play some kind of biological role, have been mostly explored for therapeutic applications, either as drugs or as drug-delivery systems.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
