Special Issue

Sustainable Chemistry in the Organic Synthesis of Bioactive Compounds

Message from the Guest Editors

Sustainable development is the new goal of modern society, for achieving "a healthy and productive life in harmony with Nature". Chemistry plays a pivotal role in maintaining and improving our quality of life, the competitiveness of the chemical industry, and the natural environment. Starting from this, the twelve principles of green chemistry serve as excellent guidance when considering the environmental impact of any chemistry. Among them, the integration of green chemistry and engineering principles into the pharmaceutical industry is encouraged. With this aim, a wider pool of clean technologies could be customized for the synthesis of key molecules with biological activity. This Special Issue welcomes original research on the development of ecofriendly processes useful not only for organic synthesis but especially for medicinal chemistry. The scope is broad and includes (1) the use of renewable feedstocks, (2) the employment of alternative energy sources, (3) the use of non-toxic solvents, (4) catalysis, and (5) hazard reduction and waste minimization

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
